Understanding Your Annual Performance Report (APR)

2006-2007

2006 4th Cycle APR

Version 2

Updated 10/3/2006

A guide to the sources and calculations used in developing your APR

TABLE OF CONTENTS

SCORING GUIDE MEASURES	1
Standard 9.1	3
Indicators 1, 2, 3, 4, 5 and 6 (MAP)	3
Standard 9.3 (ACT Calculation)	8
Standard 9.4	9
Advanced Courses Calculation (9.4.1)	9
Career Education Courses Calculation (9.4.2)	
Advanced and Career Education Courses Calculation (9.4.1 and 9.4.2)	
College Placement Calculation (9.4.3)	
Career Education Placement Calculation (9.4.4)	
College and Career Education Placement Calculation (9.4.3 and 9.4.4 Combined)	
Standard 9.5 (Graduation Rate Calculation)	21
Standard 9.6 (Attendance Calculation)	23
Standard 9.7 (Subgroup Achievement Calculation)	25
Standard 10.1 (Post-Elementary School GPA Calculation - K-8 Districts Only)	26
SCORING GUIDES	28

NOTES	47

The Department of Elementary and Secondary Education does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs and activities. Inquiries related to Department programs may be directed to the Title IX Coordinator, Jefferson State Office Building, 5th Floor, 205 Jefferson Street, Jefferson City, Missouri 65102-0480; telephone number 573-751-4212. For questions about the Annual Performance Report, please contact 573-751-6849.

SCORING GUIDE MEASURES

During the 4th MSIP Cycle, performance determines the accreditation level of a school district. Performance standards will be evaluated using status and progress measures to determine if a standard is met.

Status and progress points are combined to determine if a standard is met, unless no progress points are possible. Progress points toward meeting a standard are earned for the method awarding the maximum number of points for the district.

The detailed scoring guide for each performance standard are outlined in the section titled "SCORING GUIDES".

STATUS MEASURES

Status measures the district's level of achievement based upon a five year average of performance data, unless five years of data are not available. Status is divided into five levels as follows:

High 1 - 1 standard deviation above the mean for the state

High 2 - 1/3 of 1 standard deviation above the mean for the state

Average – Mean for the state

Below Average -1/3 of 1 standard deviation below the mean for the state

Floor – 1 standard deviation below the mean for the state

Note: The status levels for the Attendance and Career Education Course standards were established at 1/3 of 1 standard deviation below the levels cited above.

PROGRESS MEASURES

Progress measures the district's improvement over a five-year period. Progress is measured in the following ways:

Annual – This method measures improvement from year to year.

Rolling Average – This method measures improvement by comparing two-year averages. Years 1 and 2 are averaged, years 2 and 3 are averaged, years 3 and 4 are averaged, and years 4 and 5 are averaged; these averages are then compared to determine the amount of improvement.

Example:

4 th Grade Math	Year 1	Year 2	Year 3	Year 4	Year 5
Index Score	195.6	192.1	196.8	209.6	213.9

For the above scores, the rolling average would be calculated as follows:

➤ STEP 1 – Add the score for each year to the score for the following year.

Years 1 and 2: 195.6 + 192.1 = 387.7 Years 2 and 3: 192.1 + 196.8 = 388.9 Years 3 and 4: 196.8 + 209.6 = 406.4 Years 4 and 5: 209.6 + 213.9 = 423.5 > STEP 2 – Divide each of the preceding sums by 2 to determine the two-year average.

Years 1 and 2: $387.7 \div 2 = 193.85$ Years 2 and 3: $388.9 \div 2 = 194.45$ Years 3 and 4: $406.4 \div 2 = 203.2$ Years 4 and 5: $423.5 \div 2 = 211.75$

> <u>STEP 3</u> – Compare the two-year averages to determine the number of scoring points earned using the rolling average method.

4 th Grade Math	Yr 1-Yr 2	Yr 2-Yr 3	Yr 3-Yr 4	Yr 4-Yr 5
	Average	Average	Average	Average
Two-Year Average	193.85	194.45	203.2	211.75

For math, a district earns 10 progress points for each increase of 2 index points or more on the rolling average. In this example, the index score increases by .6 from the first to the second comparison, by 8.75 from the second to the third comparison, and by 8.55 from the third to the fourth comparison. A district with these scores would earn 20 progress points using the rolling average method.

3 over 2 - This method measures improvement by comparing the average of the latest 3 years of data with the average of the first two years of data.

Example:

4 th Grade Math	Year 1	Year 2	Year 3	Year 4	Year 5
Index Score	195.6	192.1	196.8	209.6	213.9

For the above scores, the 3 over 2 method would be calculated as follows:

> STEP 1 – Add the score for the first two years of data and the latest 3 years of data.

Years 1 and 2: 195.6 + 192.1 = 387.7

Years 3, 4 and 5: 196.8 + 209.6 + 213.9 = 620.3

➤ <u>STEP 2</u> – Divide preceding sums for years 1 and 2 by 2 and the sum for years 3, 4, and 5 by 3 to determine the average.

Years 1 and 2: $387.7 \div 2 = 193.85$

Years 3, 4 and 5: $620.3 \div 3 = 206.8$

➤ <u>STEP 3</u> – Compare the two-year average and the three-year average to determine the number of scoring guide points earned using the 3 over 2 method.

4 th Grade Math	Yr 1-2 Average	Yr 3, 4, & 5 Average
Average Index Scores	193.85	206.8

For math, a district earns 20 progress points for an increase of 6 index points or more on the 3 over 2 method. In this example, the index score increases by 12.95 index points. A district with this score would earn 20 progress points using the 3 over 2 method.

Standard 9.1 Indicators 1, 2, 3, 4, 5 and 6 (MAP)

Source of data used in calculation: Data are obtained from CTB McGraw-Hill, which is the contracted, testing publisher for the Missouri Assessment Program. This CTB data file is used to create online reports for district use.

Notes:

- If the MAP testing schedule is reconfigured, the MAP scoring guidelines may be redesigned to maintain the continuity of MAP measurement for MSIP purposes.
- All MAP performance data are reported to the nearest tenth.
- *MAP data for K-8 districts include only two grade spans (3-5 and 6-8).*

MEASURING MAP

The MAP Performance Index (MPI) is used to evaluate MAP performance. The index approach calculates the movement of students throughout all MAP achievement levels. Data are analyzed by grade span (3-5, 6-8, and 9-11) for each subject area using status and progress measures. During the fourth cycle of MSIP, more than five years of test data will be analyzed to account for implementation of the state's new assessment system beginning in 2006. Throughout the cycle, the weight of the test data will gradually shift from the majority of the points being awarded for the grade span test data in the beginning of the cycle, to the majority of the points being awarded for the grade level test data by the end of the cycle.

The status and progress methods are applied to each subject in each grade span. The method awarding the maximum total points from status (High 1, High 2, Average, Below Average, and Floor) and from progress (Annual, Rolling Average, and 3 over 2) is used for each subject area. The subject area/grade span standard is considered "met" if a total of 40 status points or 50 status plus progress points are earned from the grade level and grade span test data combined.

Grade Span Data

From the inception of the MAP through the 2004-2005 school year, the MAP assessments were administered to students for each subject area one time in each grade span (3-5), 6-8), and (9-11). These tests are **grade span assessments**. For MSIP purposes, the Mathematics and Communication Arts 2001-2005 grade span assessment data will be measured throughout fourth cycle. These grade span assessments measure student achievement based upon five achievement levels: (Step I, Progressing, Nearing Proficient, Proficient, and Advanced). The MPI calculation for the grade span assessment data is described on the next page.

Grade Level Data

Beginning with the 2005-2006 school year, the Mathematics and Communication Arts MAP assessments are administered to students each year in grades 3-8. Mathematics MAP assessments are administered in grade 10 and Communication Arts assessments are administered in grade 11. These tests are **grade level assessments**. For MSIP purposes, the Mathematics and Communication Arts grade level test data will be measured beginning with the 2006 school year. These grade level assessments measure student achievement based upon four achievement levels: (Below Basic, Basic, Proficient, and Advanced.) The MPI calculation for the grade level assessment data is described on the next page.

Comparing Grade Span Data with Grade Level Data

Districts **should not** try to make comparisons between 2006 grade level test data and prior grade span test data using the MPI or percent proficient. The grade level tests are new tests that were developed with different cut scores for proficiency and with only four achievement levels compared with five.

Science and Social Studies Data

During the 2002-2003, 2003-2004, 2004-2005, and 2005-2006 school years, social studies and science assessments were not state-funded. Districts were allowed to choose whether or not to use local funds to administer one or both of these assessments. Districts with four or more years (including the latest year) of science and/or social studies data may be eligible for voluntary subject bonus mets. Please see the section titled Voluntary Subject Area Bonus Points for more information.

MAP PERFORMANCE INDEX (MPI)

For each subject in each grade span, MSIP uses the index approach to compare improvement on the MAP. The index approach is based on a composite of the performance of all students across all MAP achievement levels. The assessment results in each subject tested for each year are converted to index points, and these index points are used to measure improvement from year to year.

MPI CALCULATION

The index is a single composite number that represents the performance of every student in all MAP levels in a tested subject for a defined grade span. Index points are calculated by first multiplying the percent of reportable students scoring in each achievement level for each subject and grade span by the values described below.

MPI Values for Grade Span Data (2001-2005)

Multiply the percent Advanced by 3, percent Proficient by 2.5, percent Nearing Proficient by 2, percent Progressing by 1.5, and percent Step 1 by 1. These products are then summed to produce the MPI which ranges from 100-300. (See the Grade Span MPI Example Calculation below.)

MPI Values for Grade Level Data (2006)

Grade level assessments are measured by defined grade spans (3-5, 6-8, and 9-11). The grade span MPI for the grade level assessments is determined by calculating the percent of students in each achievement level for all grades within a span. For example, the total number of reportable students in each achievement level in grades 3, 4, and 5 is divided by the total number of accountable students in grades 3, 4, and 5 to determine the percent of reportable students in each achievement level. Multiply the percent Advanced by 9, percent Proficient by 8, percent Basic by 7, and percent Below Basic by 6. These products are then summed to produce the MPI which ranges from 600-900. (See the Grade Level MPI Example Calculation on the next page.)

MPI Example Calculation - Grade Span Data

The following example shows how the index is calculated in a single subject and grade span:

> STEP 1 – The percent of students in each performance level is determined for each year.

Level	Index Point Value	Year 1	Year 2	Year 3	Year 4	Year 5
Step 1	1.0	19.5%	20.2%	17.0%	16.9%	9.6%
Progressing	1.5	21.3%	20.5%	21.3%	14.0 %	20.0%
Nearing Proficient	2.0	27.0%	27.6%	28.0%	24.6%	25.4%
Proficient	2.5	12.9%	18.4%	18.5%	22.1%	23.0%
Advanced	3.0	19.3%	13.3%	15.2%	22.4%	22.0%

➤ <u>STEP 2</u> – The percentage of students in each performance level is multiplied by the index point value for each year.

Year 1	Year 2	Year 3	Year 4	Year 5
19.5 x 1.0 = 19.50	$20.2 \times 1.0 = 20.20$	$17.0 \times 1.0 = 17.00$	16.9 x 1.0 = 16.90	$9.6 \times 1.0 = 9.60$
21.3 x 1.5 = 31.95	$20.5 \times 1.5 = 30.75$	$21.3 \times 1.5 = 31.95$	$14.0 \times 1.5 = 21.00$	$20.0 \times 1.5 = 30.00$
$27.0 \times 2.0 = 54.00$	$27.6 \times 2.0 = 55.20$	$28.0 \times 2.0 = 56.00$	24.6 x 2.0 = 49.20	$25.4 \times 2.0 = 50.80$

195.6 Index Points	192.1 Index Points	196.8 Index Points	209.6 Index Points	213.9 Index Points
19.3 x 3.0 = 57.90	13.3 x 3.0 = 39.90	$15.2 \times 3.0 = 45.60$	$22.4 \times 3.0 = 67.20$	$22.0 \times 3.0 = 66.00$
$12.9 \times 2.5 = 32.25$	$18.4 \times 2.5 = 46.00$	$18.5 \times 2.5 = 46.25$	22.1 x 2.5 = 55.25	23.0 x 2.5 = 57.50

> <u>STEP 3</u> - For scoring in each grade span, a grid is created and scoring guidelines are applied to the scores in the grid. An example appears in the grid below:

	Year 1	Year 2	Year 3	Year 4	Year 5	Status
Grade 4 Math	195.6	192.1	196.8	209.6	213.9	201.6

➤ <u>STEP 4</u> – Status is determined by adding the MPI of year 1, year 2, year 3, year 4, and year 5 and dividing by 5.

MPI Example Calculation - Grade Level Data

The following example shows how the index is calculated in a single subject and grade levels:

> <u>STEP 1</u> – The percent of students in each performance level is determined for each year. The total reportable for an achievement level is divided by the total accountable for the applicable grade level to obtain the percent reportable.

Achievement	Grade 3	Grade 4	Grade 5		Grades 3-5	Grades 3-5	Grades 3-5
Level	Number	Number	Number		Total	Total	Percent
	Reportable	Reportable	Reportable		Reportable	Accountable	Reportable
Below Basic	10	15	20	П	45	130	34.6%
Basic	15	15	10	=	40	130	30.8%
Proficient	5	10	15	=	30	130	23.1%
Advanced	5	5	5	П	15	130	11.5%
		To	tal Accountable	П	130		

> <u>STEP 2</u> – The percentage of students in each performance level is multiplied by the index point value for each year.

Achievement	Index Point Value	Percent	MPI
Level		Reportable	
Below Basic	6	34.6%	$34.6 \times 6 = 207.60$
Basic	7	30.8%	$30.8 \times 7 = 215.60$
Proficient	8	23.1%	$23.1 \times 8 = 184.80$
Advanced	9	11.5%	$11.5 \times 9 = 103.50$
			711.5 Index Points

The sum of each of these products for each subject tested is the index for that subject. The index measures improvement from one year to the next for each subject. The scoring guide defines the required improvement in index score from one year to the next.

> <u>STEP 3</u> - For scoring in each grade level, a grid is created and scoring guidelines are applied to the scores in the grid. An example appears in the grid below:

GRADE LEVEL	Year 1	Year 2	Year 3	Year 4	Year 5	Status
Grades 3-5 Mathematics	711.5					711.5

➤ <u>STEP 4</u> – Status is determined by adding the Grade Level MPI of year 1, year 2, year 3, year 4, and year 5 and dividing by the number of years.

LEVEL NOT DETERMINED (LND)

This is the percent of students for which the district is accountable who do not receive a valid MAP score in a subject area. Districts may not earn points toward meeting a MAP performance standard when the maximum percent of students in LND is exceeded. The MSIP LND criteria for the 2001-2005 data (grade span test data) and the 2006 data (grade level test data) are described below.

LND Criteria 2001-2005 data (grade span test data)

No points are awarded for grade span test data if the average LND in that subject area over the years analyzed exceeds 10%. If the LND in one or more years exceeds 14%, the average LND must be 10% or less **and** the LND in the final year of analysis must be 6% or less in order to earn scoring guide points. If grade span test data is not scored due to the LND percentage, the # symbol appears next to the subject area on the APR summary sheet.

LND Criteria 2006 data (grade level test data)

No points are awarded for grade level test data if the LND is 5% or greater in the final year of analysis or if the average LND is 5% or greater. If grade level test data is not scored due to the LND percentage, the # symbol appears next to the subject area on the APR summary sheet.

LND and MAP-A Students

Students who take the MAP-A are included in the LND for years 2001-2003; however, beginning in 2004-2005, MAP-A students with a scorable MAP-A portfolio in a grade level tested on the MAP will be assigned an achievement level.

LND and ELL Students

Scores for ELL students who have been in the United States three years or less are disaggregated from the LND if the district selects "ELL first through third year in the U.S.A." and/or "ELL less than 1 year in the U.S.A." on the student information sheet.

LND Calculation Example:

Annual LND

- 1. "Accountable Students" minus "Reportable Students" equals "LND Students"
- 2. "LND Students" divided by "Accountable Students" equals "Annual Percent of Students in LND"

Average LND

1. Sum of Annual Percent of Students in LND for all required years divided by the number of required years

	Year 1	Year 2	Year 3	Year 4	Year 5	Average LND
Accountable	50	45	52	60	50	
Reportable	45	40	49	58	49	
LND Students	5	5	3	2	1	
Percent of Students in LND	10.0%	11.1%	5.8%	3.3%	2.0%	6.4%

Standard 9.3 ACT Calculation

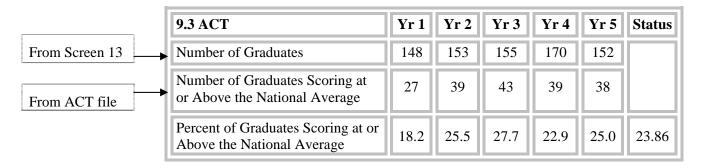

Sources of data used in calculation:

- June Cycle of Core Data, Screen 13
- ACT File

NOTES:

- Only scale score data as reported by ACT will be used in these calculations.
- When students take the ACT multiple times, the highest test score is used to determine the number of graduates scoring at or above the national average.

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of graduates scoring at or above the national average is determined by dividing the number of graduates scoring at or above the national average by the number of graduates, then multiplying by 100.

EXPLANATION OF DATA	EXAMPLES OF DATA	EXAMPLES OF
	(using Yr 1-Yr 5 figures)	CALCULATIONS
1) The number of graduates is reported on	number of graduates = 148	
Screen 13.		
2) The number of graduates scoring at or	number of graduates	
above the national average is provided by	scoring at or above the	
ACT.	national average = 27	
3) The percent of graduates scoring at or	a) number of graduates =	% of graduates scoring at or
above the national average is determined by	148	above the national average =
dividing the number of graduates scoring at	b) number of graduates	
or above the national average by the	scoring at or above the	$27 \div 148 = .182$
number of graduates , then multiplying by	national average = 27	
100.		$.182 \times 100 = 18.2\%$
4) Status is determined by adding Yr1, Yr2,	a) $Yr1 + Yr2 + Yr3 + Yr4 +$	18.2 + 25.5 + 27.7 + 22.9 +
Yr3, Yr4, and Yr5 of the percent of	Yr 5 = 119.30	25.0 = 119.30
graduates scoring at or above the national		
average and dividing by 5.		$119.30 \div 5 = 23.86\%$

For more information on the ACT or to obtain the national average, visit the ACT website at www.act.org.

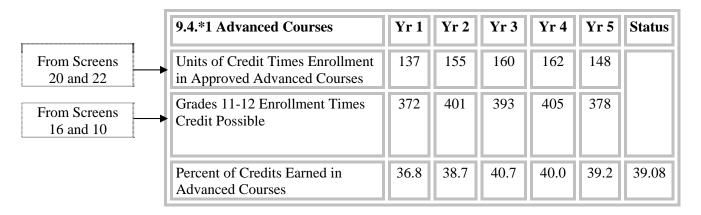

Standard 9.4 Advanced Courses Calculation (9.4.1)

Sources of data used in calculation:

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10

NOTE: In addition to the advanced courses provided within the resident district, advanced courses provided off site are automatically included in the calculation for 9.4.1 if the district submits the required data (including course numbers) on Core Data Screen 22. Screen 22 data must be reported for each area institution that provides advanced courses (i.e., other districts, community colleges, four-year colleges and universities, and Internet/electronic instructional providers). Only those specific courses with course codes and grade levels matching those on the approved advanced course list, courses coded with a program code of IB or AP, and dual credit courses (excluding career education dual-credit classes) count in the advanced course calculation.

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of credits earned in advanced courses is determined by dividing the units of credit times enrollment in approved advanced courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA		DATA	EXAMPLES OF
	(using Year 1 figures from		ires from	CALCULATIONS
	above)			
1) Units of credit times enrollment in	ADVANCED			
approved advanced courses is determined	Course #	Credit	<u>Enroll</u>	Adv. Course Units Earned
by using the courses reported on Screen 20	054810	1	18	1 X 18 = 18
that match the advanced course criteria (i.e.	056500	1	16	1 X 16 = 16
course number, sequence, and grade level	062000	.5	20	$.5 \times 20 = 10$
see below for a list of advanced courses) and	066300	1	17	1 X 17 = 17
non-career education dual-credit courses	115860	1	19	1 X 19 = 19
reported on Screen 22. The credit value of	991105	2	21	$+2 \times 21 = 42$
each course is multiplied by the course				122
enrollment, then these products are summed.				

	DUAL CREDIT (excluding career education) Course # Credit Enroll 115861 1 15	Dual Credit Units Earned 1 X 15 = 15 122 + 15 = 137 Total Units Earned
2) Grades 11-12 enrollment times credits possible is determined by using the sum of the enrollment in grades 11 and 12 (using	September enrollment for grades 11 and 12 = 62	
September count), which is reported on Screen 16. This total enrollment number is multiplied by the total number of periods per day, as reported on Screen 10. If the reported periods per day are less than 6, this indicates block scheduling. In this case, the enrollment is multiplied by total periods per day times 2.	Periods per day = 6	62 X 6 = 372
3) The percent of credits earned in	a) units of credit times	% of credits earned in
advanced courses is determined by dividing units of credit times enrollment in	enrollment in advanced courses = 137	advanced courses =
advanced courses by grades 11-12 enrollment times credits possible, then	b) grades 11-12 enrollment times credits possible = 372	$137 \div 372 = .368$
multiplying by 100.		.368 X 100 = 36.8%
4) Status is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3 + Yr4 +	36.8 + 38.7 + 40.7 + 40.0 =
Yr3, Yr4, and Yr5 of the percent of credits	Yr 5 = 195.40	195.40
earned in advanced courses and dividing by		
5.		$195.40 \div 5 = 39.08\%$

List of Advanced Courses

The following courses/course codes have been designated "Advanced Courses." These courses are considered advanced because they are over and above the courses required for graduation. It is assumed that the content of the courses, in general, is at a level suitable for juniors and seniors who are preparing for postsecondary education or training

Course Code	Course Name	Description
054800	Language Arts	Grade 11 or 12 and sequence 3 or greater
054804-5	Comp/Creative Writing	Grade 11 or 12
054806	Applied Comm.	Grade 11 or 12 and sequence 3 or greater
054810	Journalism	Grade 11 or 12 and sequence 2 or greater
054817	Folklore	Grade 11 or 12
054819-28	Literature, Various	Grade 11 or 12
054845	Shakespeare	Grade 11 or 12
054850	Mythology	Grade 11 or 12
054860	Word Study (Semantics)	Grade 11 or 12
054861	C. Prep English	Grade 11 or 12
054863	Satire-Humor	Grade 11 or 12
054864	Ethnic Literature	Grade 11 or 12
056500	Speech	Grade 11 or 12 and sequence 2 or greater
056510	Debate	Grade 11 or 12
062000	American Sign Language	Grade 11 or 12
064900	French	sequence 2 or greater

065100	German	sequence 2 or greater
065700	Latin	sequence 2 or greater
066200	Russian	sequence 2 or greater
066300	Spanish	sequence 2 or greater
067100	Hebrew	sequence 2 or greater
068000	Japanese	sequence 2 or greater
069010	Chinese	sequence 2 or greater
069020	Italian	sequence 2 or greater
115800	Mathematics (Integrated)	Grade 11 or 12 and sequence 3 or greater
115810	Algebra	sequence 2 or greater
115825	Applied Math	Grade 11 or 12 and sequence 3 or greater
115830	Geometry	
115840	Math Analysis	Grade 11 or 12
115860	Trigonometry	Grade 11 or 12
115861	Alg-Trigonometry	Grade 11 or 12
115865	Analytical Geometry	Grade 11 or 12
115866	Calculus	Grade 11 or 12
115875	Prob-Statistics	Grade 11 or 12
133810	Astronomy	Grade 11 or 12
133820	Geology	Grade 11 or 12
134200	Biology	Grade 11 or 12 and sequence 2 or greater
134210	Botany	Grade 11 or 12
134220	Zoology	Grade 11 or 12
134221	Phys-Anatomy	Grade 11 or 12

Career Education Courses Calculation (9.4.2)

Sources of data used in calculation:

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10
- State-Approved Career Education Course List

NOTE: Career education courses reported on Screens 20 and 22 are compared with a list of the district's state approved career education courses. Only those career education courses verified by the Division of Career Education as state approved are counted for MSIP purposes. Dual-credit career education classes are included in this standard.

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of credits earned in career education courses is determined by dividing the units of credit times enrollment in approved career education courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA	EXAMPLES OF
	(using Year 1 figures from above)	CALCULATIONS
1) The units of credit times enrollment in	CAREER ED. (on-site)	
approved career education courses is	Course # Credit Enroll	Car. Ed. Units Earned On-
determined by using data reported on	034354 1.5 17	<u>site</u>
Screen 20 to identify state-approved career	034380 1 13	$1.5 \times 17 = 25.5$
education courses, indicated by a program	040080 2 18	1 X 13 = 13
code "01" (see next page for exceptions).		$+2 \times 18 = 36$
Data from Screen 22 are used to identify		74.5
career education courses offered off-site	CAREER ED. (off-site)	
(i.e., at an area career education school or	Course # Credit Enroll	
college). The credit value of each course is	016720 1 15	Car. Ed. Units Earned Off-
multiplied by the course enrollment, then		<u>site</u>
the products are summed.		1 X 15 = 15
		74.5 + 15 = 89.5 Total Units
		Earned
2) Grades 11-12 enrollment times credits	September enrollment for grades	
possible is determined by using the sum of	11 and 12 = 62	62 X 6 = 372
the enrollment in grades 11 and 12 (using		

September count), which is reported on	Periods per day $= 6$	
Screen 16. This total is multiplied by the		
total number of periods per day, as reported		
on Screen 10. If the reported periods per		
day are less than 6, this indicates block		
scheduling. In this case, the enrollment is		
multiplied by total periods per day times 2.		
3) To determine percent of credits earned	a) units of credit times enrollment	% of credits earned in
in career education courses, the units of	in career education courses = 89.5	career education courses =
credit times enrollment in career	b) grades 11-12 enrollment times	$89.5 \div 372 = .241$
education courses are divided by grades	credits possible = 372	
11-12 enrollment times credits possible,		.241 X 100 = 24.1%
then multiplied by 100.		
4) Status is determined by adding Yr1, Yr2,	a) $Yr1 + Yr2 + Yr3 + Yr4 + Yr5$	24.1 + 25.4 + 23.9 + 27.7 +
Yr3, Yr4, and Yr5 of the percent of credits	= 125.6	24.5 = 125.6
earned in career education courses and		
dividing by 5.		$125.6 \div 5 = 25.12\%$

Career Education Courses Exceptions

All state-approved career education courses are used in the evaluation of MSIP Performance Standard 9.4.2 **except for the following:**

Course Code	Course Name
016700	Exploring Agriculture
016710	Agricultural Science 1
016760	Agricultural Science 2
096800	Exploratory Family and Consumer Sciences

Note: Please contact the Division of Career Education (573/751-3872) if you have questions regarding the approval of a career education program.

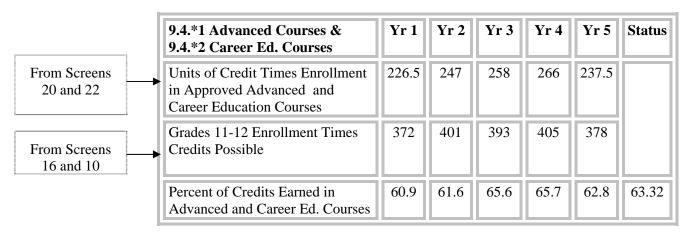

Advanced and Career Education Courses Calculation (9.4.1 and 9.4.2)

Note: This calculation is used to determine if a district meets 9.4.1 and 9.4.2 using the "combined" method.

Sources of data used in calculation:

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10
- State-Approved Career Education Course List

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of credits earned in advanced and career education courses combined is determined by dividing the units of credit times enrollment in approved advanced and career education courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

1		
EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA	EXAMPLES OF
	(using Yr 1 figures from above)	CALCULATIONS
1) Units of credit times enrollment in approved	a) Units of credit times	137 + 89.5 = 226.5
advanced and career education courses is calculated	enrollment in approved	
by adding the units of credit times enrollment in	advanced courses = 137	
approved advanced courses to the units of credit times	b) Units of credit times	
enrollment in approved career education courses. (For	enrollment in approved career	
further explanation, see Subsections D1 and D2.)	education courses = 89.5	
2) Grades 11-12 enrollment times credits possible is determined by using the sum of the enrollment in grades 11 and 12 (using September count), which is	September enrollment for grades 11 and 12 = 62	62 X 6 = 372
reported on Screen 16. This total enrollment number is multiplied by the total number of periods per day, as reported on Screen 10. If the reported periods per day are less than 6, this indicates block scheduling. In this case, the enrollment is multiplied by total periods per day times 2.	Periods per day = 6	

3) The percent of credits earned in advanced and	a) units of credit times	% of credits earned in
career education courses is determined by dividing	enrollment in advanced courses	advanced courses =
units of credit times enrollment in approved	= 226.5	
advanced and career education courses by grades	b) grades 11-12 enrollment	$226.5 \div 372 = .609$
11-12 enrollment times credits possible, then	times credits possible = 372	
multiplying by 100.	-	.609 X 100 = 60.9%
4) Status is determined by adding Yr1, Yr2, Yr3, Yr4,	a) Yr1 + Yr2 + Yr3 + Yr4 +	60.9 + 61.6 + 65.6 +
and Yr5 of the percent of credits earned in advanced	Yr 5 = 316.60	65.7 + 62.8 = 316.60
and career education courses and dividing by 5.		
		$316.60 \div 5 = 63.32\%$

College Placement Calculation (9.4.3)

Sources of data used in calculation:

- February Cycle of Core Data, Screen 8
- June Cycle of Core Data, Screen 13

Example of supporting data format for APR:

	9.4.*3 College Placement	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
From Screen 8	Number of Graduates Entering College	69	72	79	83	93	
From Screen 13 (previous year)	Number of Graduates	126	133	128	141	143	
	Percent of Graduates Entering College	54.8	54.1	61.7	58.9	65.0	58.90

Method for calculating supporting data:

The percent of graduates entering college is determined by dividing the <u>number of graduates entering college</u> by the <u>number of graduates</u>, then multiplying by 100.

EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA (using Year 1 figures from above)		EXAMPLES OF CALCULATIONS
1) The number of graduates entering	,	Totals	
college is determined by using the sum of the previous year's graduates who entered 4-year	4-year college 43		10.16.10.60
college, 2-year college, or non-college credit	2-year college	16	43+16+10 = 69
postsecondary school (i.e., technical school), as reported on Screen 8.	non-college	10	
2) The number of graduates is reported on Screen 13 from the previous year of Core Data.	graduates = 1	126	
3) The percent of graduates entering	a) number of gradu		% of graduates entering
college is determined by dividing the	entering college =		college =
number of graduates entering college by	b) number of gradu	iates =	$69 \div 126 = .548$
the number of graduates, then multiplying	126		
by 100.			$.548 \times 100 = 54.8\%$
4) Status is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3 + Yr4 +		54.8 + 54.1 + 61.7 + 58.9 +
Yr3, Yr4, and Yr5 of the percent of	Yr 5 = 294.50		65.0 = 294.50
graduates entering college and dividing by			
5.			$294.50 \div 5 = 58.90\%$

Career Education Placement Calculation (9.4.4)

Sources of data used in calculation:

• February Cycle of Core Data, Screens 26 and 27

Example of supporting data format for APR:

	9.4.*4 Career Ed. Placement	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
From Screens 26 and 27	Number of Graduates Completing a Career Education Program	41	36	38	42	44	
From Screens 26 and 27	Number of Graduates Completing a Career Education Program Placed in Occupations Relating to their Training, Attending College, or in the Military	33	24	27	32	33	
	Percent of Career Education Completers who are Placed	80.5	66.7	71.1	76.2	75.0	73.90

Method for calculating supporting data:

The percent of career education completers who are placed is determined by dividing the <u>number of graduates</u> completing a career education program placed in occupations relating to their training, attending college, or in the military by the number of graduates completing a career education program, then multiplying by 100.

EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS
1) The number of graduates	SCREEN 26	SCREEN 26 =
completing a career education	Emp Rel = 5 Emp N-R = 3 Ced Rel = 0	5+3+0+6+0+1+1+2+4 =
program is determined by adding	Ced N-R = 6 Not $Emp = 0$ Nav $Plc = 1$	22
the number of graduates reported on	Sts Unk = 1 Mil Rel = 2 Mil N-R = 4	
Screens 26 (for students reported by	SCREEN 27	SCREEN 27 =
the comprehensive high school) and	Emp Rel = 7 Emp N-R = 2 Ced Rel = 2	7+2+2+3+1+0+0+3+1=
27 (for students reported by the	Ced N-R = 3 Not $Emp = 1$ Nav $Plc = 0$	19
AVTS) in each of the following	Sts Unk = 0 Mil Rel = 3 Mil N-R = 1	
categories: EMP REL, EMP N-R,		TOTAL = 22+19=41
CED REL, CED N-R, NOT EMP,		
NAV PLC, STS UNK, MIL REL,		
and MIL N-R.		
2) The number of graduates	SCREEN 26	SCREEN 26 =
completing a career education	Emp Rel = 5 Ced Rel = 0 Ced N-R = 6	5+0+6+2+4=17
program placed in occupations	Mil Rel = 2 Mil N-R = 4	
relating to their training, attending		
college, or in the military is		
determined by adding the number of	SCREEN 27	SCREEN 27 =
graduates reported on Screens 26 and	Emp Rel = 7 Ced Rel = 2 Ced N-R = 3	7+2+3+3+1 = 16
27 in the following categories: EMP	Mil Rel = 3 Mil N-R = 1	
REL, CED REL, CED N-R, MIL		TOTAL = 17 + 16 = 33
REL, MIL N-R.		

3) The percent of career education completers who are placed is	a) number of graduates completing a career education program = 41	percent of career education completers
determined by dividing the number	b) number of graduates completing a	who are placed =
of graduates completing a career	career education program placed in	T
education program placed in	occupations relating to their training,	$33 \div 41 = .805$
occupations relating to their	attending college, or in the military =33	
training, attending college, or in		
the military by the number of		.805 X 100 = 80.5%
graduates completing a career		
education program, then		
multiplying by 100.		
4) Status is determined by adding	a) $Yr1 + Yr2 + Yr3 + Yr4$	80.5 + 66.7 + 71.1 +
Yr1, Yr2, Yr3, Yr4, and Yr5 of the	+ Yr 5 = 369.50	76.2 + 75.0 = 369.50
percent of career education		
completers who are placed and		$369.50 \div 5 = 73.90\%$
dividing by 5.		

Career Education Placement/Follow-Up Guidelines

Follow-up data is reported on the previous year's graduates based on the status of the graduates 180 days following their exit from career education training. *Each graduate should be reported in only one career education program area.* Districts should collect follow-up information on any student who graduated high school and received credit in at least one state-approved career education course (excluding Exploring Agriculture, Industrial Technology, and any FACS course) during grades 9-12. However, if students completed state-approved career courses at the comprehensive high school and the area career education school, their follow-up data should <u>not</u> be reported for both locations. Generally, the area career education school is responsible for completing the follow-up data on screen 27 and providing the sending school with a copy.

If the graduate is employed and continuing education, use the following guidelines:

- A graduate attending school (full- or part-time) <u>and</u> employed (full or part-time) in a field for which they were trained, should be reported as "employed related" (EMP REL).
- A graduate attending school (full- or part-time) in a field for which they were trained, but not employed in a field for which they were trained should be reported as "continuing education related" (CED REL).
- A graduate attending school (full- or part-time) in a field for which they were <u>not</u> trained, but employed (full or part-time) in a field for which they were trained should be reported as "employed related" (EMP REL).

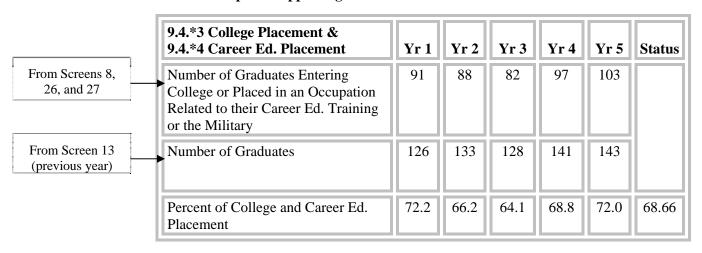

College and Career Education Placement Calculation (9.4.3 and 9.4.4 Combined)

Note: This calculation is used to determine if a district meets 9.4.3 and 9.4.4 using the "combined" method.

Sources of data used in calculation:

- February Cycle of Core Data, Screens 8, 26, and 27
- June Cycle of Core Data, Screen 13

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of graduates entering college or in career education placement is determined by dividing the <u>number of graduates entering college or placed in an occupation related to their career education training or the military by the number of graduates, then multiplying by 100.</u>

by the <u>number of graduates</u> , then multiplying to	y 100.	
EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA	EXAMPLES OF
	(using Year 1 figures from above)	CALCULATIONS
1) The number of graduates entering	SCREEN 8	SCREEN 8
college or placed in an occupation related	4-year college = 43	
to their career education training or the	2-year college = 16	43+16+10 = 69
military is determined by using the sum of	non-college =10	
the previous year's graduates reported on	SCREEN 26	SCREEN 26
Screen 8 who entered 4-year college, 2-year	Emp Rel =5 Mil Rel = 2	5+2+4 = 11
college, or non-college credit postsecondary	Mil N-R = 4	
school (i.e., technical school) and adding this	SCREEN 27	SCREEN 27
to the number of the previous year's	Emp Rel =7 Mil Rel = 3	7+3+1 = 11
graduates reported in one of the following	Mil N-R = 1	TOTAL
categories on Screens 26 and 27: EMP REL,		
MIL REL, and MIL NR.		69+11+11 = 91
2) The number of graduates is reported on	graduates = 126	
Screen 13 from the previous year's Core		
Data.		

3) The percent of college and career	a) number of graduates entering	% of graduates entering
education placement is determined by	college or placed in an occupation	college =
dividing the number of graduates entering	related to their career education	
college or placed in an occupation related	training or the military = 91	$91 \div 126 = .722$
to their career education training or the	b) number of graduates = 126	
military by the number of graduates, then		$.722 \times 100 = 72.2\%$
multiplying by 100.		
4) Status is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3+ Yr4	72.2 + 66.2 + 64.1 +
Yr3, Yr4, and Yr5 of the percent of college	+ Yr 5 = 343.30	68.8 + 72.0 = 343.30
and career education placement and		
dividing by 5.		$343.30 \div 5 = 68.66\%$

Standard 9.5 Graduation Rate Calculation (9.5)

Sources of data used in calculation:

• June Cycle of Core Data, Screen 13

NOTES:

- Dropouts reported as the result of an expulsion due to a violent act according to Section 160.261 and 167.171, RSMo. will be excluded from the total number of dropouts used for MSIP purposes. The number of 9-12 grade students reported as expelled on Screen 9 of Core Data will be subtracted from the total number of 9-12 dropouts reported on Screen 13 of Core Data.
- In the year of a district's MSIP review, two points are deducted from 9.5 if the district does not consistently report students who drop out of school to the Missouri Literacy Hotline, as required by Standard 8.7.3.
- In the year of a district's MSIP review, one bonus point is added for each of the past five years in which at least 5% of the district's five-year average number of seniors earned a GED within 5 years of dropping out of school (see explanation and example on next page).

Example of supporting data format for APR:

	9.5 Graduation Rate	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
From Screen 13	Number of Graduates	126	133	128	141	143	
From Screen 13	Number of 9-12 Cohort Dropouts + Graduates	135	142	135	147	149	
	Graduation Rate	93.3	93.7	94.8	95.9	96.0	94.74

Method for calculating supporting data:

The persistence to a graduation rate is determined by dividing the <u>number of graduates</u> by the <u>number of graduates</u> plus the <u>number of cohort dropouts in grades 9-12</u>, then multiplying by 100.

EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS
1) The number of graduates is	number of graduates = 126	
reported on Screen 13.		
2) The number of 9-12 cohort	number of graduates = 126	
dropouts + graduates is determined		
by adding the number of graduates	Cohort dropouts:	126 + 9 = 135
reported on Screen 13 and the number	Grade $12-2005 = 2$	
of cohort dropouts reported on Screen	Grade $11-2004 = 2$	
13.	Grade $10-2003 = 2$	
	Grade $09-2002 = 3$	
	Total Cohort dropouts: 9	
3) The persistence to graduation rate	a) number of graduates = 126	
is determined by dividing the number	b) number of 9-12 cohort dropouts +	$126 \div 135 = .933$
of graduates by the number of 9-12	graduates = 135	
cohort dropouts + graduates		$.933 \times 100 = 93.3\%$

4) Status is determined by adding Yr1,	a) Yr1 + Yr2 + Yr3+ Yr4	93.3 + 93.7 + 94.8 +
Yr2, Yr3, Yr4, and Yr5 of the	+ Yr 5 = 473.70	95.9 + 96.0 = 473.70
persistence to graduation rate and		
dividing by 5.		$473.70 \div 5 = 94.74\%$

Bonus Points Calculation

In the year of a district's MSIP accreditation, one bonus point is added for each of the past five years in which at least 5% of the district's five-year average number of seniors earned a GED within 5 years of dropping out of school. The following step-by-step example illustrates how the bonus points are calculated.

Example:

# of seniors (as reported in the September count on	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5
Core Data screen 16)	38	45	42	46	39
# of GED completers (only those who complete the					
GED within five years of their drop-out date are	0	1	3	2	1
counted in the bonus points calculation)					

STEP 1 – Average the number of seniors from the past five years.

$$\frac{38+45+42+46+39}{5} = 42$$

> <u>STEP 2</u> – Multiply the five-year average by .05 (rounding to the nearest whole number). This product is 5% of the average number of seniors.

$$.05 \times 42 = 2$$

➤ <u>STEP 3</u> – Compare the product of the calculation in step 2 to the annual number of drop-outs who completed a GED within five years of their drop-out date. The district earns a point for each year in which the number of GED completers equals or exceeds 5% of the average number of seniors.

In this example, 5% of the average number of seniors is two. The district earns a total of two points – one point for Year 3 and one point for Year 4 – because the number of GED completers equals or exceeds two in these years.

Standard 9.6 **Attendance Calculation**

Sources of data used in calculation:

- June Cycle of Core Data, Screens 10 and 14
- February Cycle of Core Data, Screen 16

Example of supporting data format for APR:

9.6 Average Daily Attendance	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
Grades K-8	94.3	94.2	94.3	94.4	94.6	
Grades 9-12	90.8	91.8	90.5	91.1	92.4	
Grades K-12	93.1	93.5	93.1	93.4	93.9	93.40

Method for calculating supporting data:

If five years of hours-of-absence data are available for all grade levels, the average daily attendance for each grade span is determined by using the "hours of absence" method. This method is calculated by dividing the hours of attendance by the hours possible, then multiplying by 100.

If five years of hours-of-absence data are not available at all grade levels, the "January membership" method is used. This method is calculated by dividing the average daily attendance by the reported January membership count, then multiplying by 100.

	HOURS OF ABSENCE METHOD						
EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF					
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS					
1) The hours of attendance is	ATTENDANCE HOURS	163,298+40,113+0+0 = 203,411					
determined by adding the Full-	Full-time: 163,298						
time, Part-time, Deseg In, and	Part-time: 40,113						
Fed Lands attendance hours	Deseg in: 0						
reported on Screen 14.	Fed lands: 0						
2) The hours possible is		a) hours of absence =					
determined by adding attendance	Resident I hours of absence = 15,061	15,061+0+0 = 15,061					
hours and hours of absence.	Deseg In hours of absence = 0	b) attendance hours = 203,411					
Hours of absence are reported on	Fed Lands hours of absence = 0	c) hours possible =					
Screen 14 and include the totals		15,061+203,411 = 218,472					
for Resident I, Deseg In, and Fed							
Lands.							
3) The attendance rate using	a) hours of attendance = 203,411	Average daily attendance using					
the "hours of absence" method	b) hours possible = 218,472	the hours of absence method =					
is determined by dividing the							
hours of attendance by the		$203,411 \div 218,472 = .931$					
hours possible, then multiplying							
by 100.		.931 X 100 = 93.1%					

4) Status is determined by	a) total of $Yr1 + Yr2 + Yr3 + Yr4$	93.1 + 93.5 + 93.1 + 93.4
adding Yr1, Yr2, Yr3, Yr4, and	+ Yr 5 = 467.0	+ 93.9 = 467.0
Yr5 of the grades K-12 average		
daily attendance and dividing		$467.0 \div 5 = 93.40\%$
by 5.		

Example of supporting data format for APR:

9.6 Average Daily Attendance	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
Grades K-8	94.3	94.2	94.3	94.4	94.6	
Grades 9-12	90.8	91.8	90.5	91.1	92.4	
Grades K-12	93.1	93.5	93.1	93.4	93.9	93.40

by the hours in session reported	Hours in session: 1084.65	
on Screen 10.		
2) The January membership is	Full-time: 161	January membership =
determined by adding the	Part-time: 40.2	161+40.2+0+0=201.2
number of students reported as	Deseg in: 0	
Full-time, Part-time, Deseg In, or	Fed land: 0	
Fed Lands for the January		
membership on Screen 16.		
3) The average daily	a) average daily attendance = 187.54	average daily attendance using
attendance using the January	b) January membership = 201.2	the January membership method
membership method is		
determined by dividing the		$187.54 \div 201.2 = .932$
average daily attendance by the		
January membership, then		.932 X 100 = 93.2%
multiplying by 100.		
4) Status is determined by	a) Yr1 + Yr2 + Yr3+ Yr4	93.1 + 93.5 + 93.1 + 93.4
adding Yr1, Yr2, Yr3, Yr4, and	+ Yr 5 = 467.0	+ 93.9 = 467.0
Yr5 of the grades K-12 average		
daily attendance and dividing		$467.0 \div 5 = 93.40\%$
by 5.		

Standard 9.7 Subgroup Achievement Calculation

Sources of data used in calculation:

• Adequate Yearly Progress (AYP) Reports

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of subgroups meeting AYP is determined by dividing the <u>Number of Accountable Subgroups</u> <u>Meeting AYP</u> by the <u>Number of Accountable AYP Subgroups</u>, then multiplying by 100.

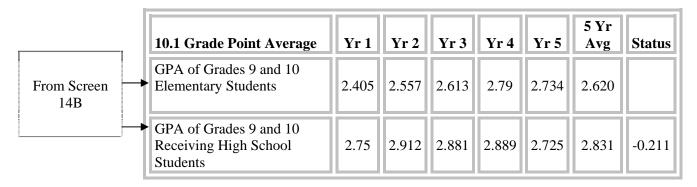

EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS
1) Number of accountable AYP	number of accountable AYP	
subgroups is reported on the District-	subgroups=10	
Level AYP Summary Report as		
"Overall Subgroups (Both Math and		
Communication Arts) Total Groups"		
2) Number of accountable subgroups	number of accountable subgroups	
meeting AYP is reported on the	meeting AYP=8	
District-Level AYP Summary Report		
as "Overall Subgroups (Both Math and		
Communication Arts) Groups Met"		
3) The percent of subgroups met is	a) number of accountable subgroups	
determined by dividing the number of	meeting AYP=8	$8 \div 10 = .80$
accountable subgroups meeting AYP	b) number of accountable AYP	
by the number of accountable AYP	subgroups=105	$.80 \times 100 = 80.0\%$
subgroups		

Standard 10.1 Post-Elementary School GPA Calculation (K-8 Districts Only)

Sources of data used in calculation:

• June Cycle of Core Data, Screen 14B

Example of supporting data format for APR:

Method for calculating supporting data:

The <u>GPA of grades 9 and 10 elementary students</u> is determined by finding the average GPA (using a 4-point scale) of resident II (tuition) students who graduated from a K-8 district and are in either grade 9 or 10 at the receiving school.

The <u>GPA of grades 9 and 10 receiving high school students</u> is determined by finding the average GPA (using a 4-point scale) for students in grades 9 and 10 who are not resident II students.

EXPLANATION OF CALCULATIONS	EXAMPL (using Year al			EXAMPLES OF CALCULATIONS		
1) The GPA of grades 9 and 10 elementary	K-8 g	graduat	tes	11-pt	Calculation	4-pt
students is calculated using the GPA (rounded	GR	RADE 9		7.34	$(7.34+1) \div 3$	2.78
to the nearest thousandth) reported on Screen			Students	4.513	$(4.513+1) \div 3$	1.838
14B for ninth- and tenth-grade resident II		7.34	5	6.428	$(6.428+1) \div 3$	2.476
students who graduated from a K-8 district. If	Dist.#2	4.513	2	4.895	$(4.895+1) \div 3$	1.965
GPAs are reported on an 11-point scale, they must be converted to a 4-point scale before	CD	ADE 10	,	Calcula	ted GPA	
performing the calculations. The formula for		ADE 10 GPA	Students	2.78	X 5 = 13.9	
this conversion is $(GPA + 1) \div 3$. To		6.428	2	1.838	$8 \times 2 = 3.676$	
determine the overall average of the K-8		4.895	2	2.476	$6 \times 2 = 4.952$	
graduate GPAs, first the GPA for grade 9 is	21302		_	1.965	X 2 = 3.93	
multiplied by the number of students in grade				To	= 26.458	
9. Next, the GPA for grade 10 is multiplied				Total #	K-8 graduates	
by the number of students in grade 10. These					5+2+2+2 = 11	
steps are repeated for all districts attended by the K-8 graduates. The products are then				Final C	alculated GPA	
summed and divided by the total number of K-8 graduates in grades 9 and 10.				26	.458 ÷ 11 = 2.40)5

2) The GPA of grades 9 and 10 elementary	Receiving District Students	11-pt Calculation 4-pt
students is calculated using the GPA (rounded	GRADE 9	7.574 $(7.574+1) \div 3$ 2.858
to the nearest thousandth) reported on Screen	District GPA Students	(**** / -
14B for ninth- and tenth-grade receiving-	Dist.#1 7.574 615	(6.126.1)
district students (GPAs reported on an 11-	Dist.#1 7.374 013 Dist.#2 6.158 263	7.667 $(7.667+1) \div 3$ 2.889
point scale are converted to a 4-point scale).	Dist.π2 0.136 203	$6.475 (6.475+1) \div 3 2.492$
To determine the overall average of the	GRADE 10	Calculated GPA
receiving-district student GPAs, first the GPA	District GPA Students	2.858 X 615 = 1757.67
for grade 9 is multiplied by the number of	Dist.#1 7.667 589	2.386 X 263 = 627.518
students in grade 9. Next, the GPA for grade	Dist.#2 6.475 206	2.889 X 589 = 1701.621
10 is multiplied by the number of students in	Dist.#2 0.473 200	2.492 X 206 = 513.352
grade 10. These steps are repeated for all		Total = 4600.161
receiving districts. The products are then		Total # Receiving Dist. Students
summed and divided by the total number of		615+263+589+206 = 1673
receiving-district students in grades 9 and 10.		Final Calculated GPA
		4600.161 ÷ 1673 = 2.75
3) The 5 Yr Avg of the GPA of grades 9 and	a) 5 Yr Avg of the GPA of	GPA of grades 9 and 10
10 elementary students is determined by	grades 9 and 10 elementary	elementary students:
adding Yr1, Yr2, Yr3, Yr4, and Yr5 and	students $Yr1 + Yr2 + Yr3 +$	2.405 + 2.557 + 2.613 + 2.79 +
dividing by 5. The 5 Yr Avg of the GPA of	Yr4 + Yr 5 = 13.099	2.734 = 13.099
Grades 9 and 10 Receiving High School	b) 5 Yr Avg of the GPA of	$13.099 \div 5 = $ 2.620
Students is determined by adding Yr1, Yr2,	Grades 9 and 10 Receiving	GPA of grades 9 and 10
Yr3, Yr4, and Yr5 and dividing by 5.	High School Students Yr1 +	receiving high school students:
	Yr2 + Yr3 + Yr4 + Yr5 =	2.75 + 2.912 + 2.881 + 2.889 +
	14.157	2.725 = 14.157
		$14.157 \div 5 = $ 2.831
4) Status is determined by subtracting the 5	a) GPA of grades 9 and 10	
year average of the GPA of Grades 9 and 10	elementary students = 2.620	Elem. Rec HS
Elementary Students from the 5 year	b) GPA of grades 9 and 10	2.620 - 2.831 = -0.211
average of the GPA of Grades 9 and 10	receiving high school	
Receiving High School Students.	students = 2.831

NOTES

General

14 standards are measured on the 2006 APR.

Status and Progress measures are applied to all performance standards

MAP Standards

- MPI is used to measure all MAP standards
- Reading standards are not evaluated
- Mathematics and Communication Arts are evaluated as separate standards
- Bonus points for closing the achievement gap are not included in the 2006 APR, but will be incorporated into the 2007 APR.
- Bonus points for Science and Social Studies are included. Please see the section titled "Voluntary Subject Area Bonus Points" for more details.

Voluntary Subject Area Bonus Points

Bonus points may be earned in place of a MAP standard that is not met under the following conditions:

- At least four years of data, including the latest year of data must be available
- The LND must not be exceeded.
- A maximum of two bonus points may be earned; one in Science and one in Social Studies.

New Standard

Graduation rate replaces dropout rate

The graduation rate formula is: (graduates/(graduates + cohort dropouts)) * 100.

Recent Changes to Scoring Guide

- The status levels for the Combined Advanced and Career Education coursework has been lowered.
- The status levels for attendance have been lowered.
- The Alternate High status level was added.

Accreditation Levels

The accreditation level and review types are as follows:

*A district must meet at least one MAP standard to be provisionally accredited.

Accreditation

Status	A	ccredited	Provisional	Unaccredited
Review Status	Mini Review Targeted Review		Full Review	Full Review
	Full Waiver	Limited Waiver		
K-12 Districts	12+ Met	9-11 Met	6-8 Met	1-5 Met
K-8 Districts	6+ Met	5 Met	4 Met	1-3 Met
